PROFILE

Aspiring Web Developer seeking a dynamic position to leverage my programming and web design expertise in crafting high-quality web applications. Eager to contribute innovative solutions in a challenging environment while actively pursuing continuous learning and skill enhancement.

EXPERIENCE

BACKEND DEVELOPER

ILBC, Edtech

2023 Jun - Present

Responsible for database design and transforming business requirements into efficient coding logic. Spearheaded API development for an LMS project, seamlessly integrating third-party APIs such as Google API and OAuth for secure authentication. Additionally, facilitated seamless user communication by integrating SMS services, and ensured smooth transaction processes through seamless payment gateway integration.

INTERNSHIP LARAVEL DEVELOPER

Host Myanmar, IT Solution

2023 May - 2023 Jun

Assisted senior developers in implementing new features and debugging in Laravel projects. Developed assigned tasks under project manager's guidance, enhancing skills in Laravel development practices and teamwork.

Interpersonal Skills

- Effective Communication
- Team Collaboration
- Problem Solving
- Attention to Detail

Language Skills

- Upper Intermediate Level of English

CERTIFICATES

- Using MongoDB with Node by MongoDB

- Developing Back-End Apps with Node.js and Express by IBM

- Introduction to Software Engineering by IBM

- Hands-on Introduction to Linux Commands and Shell Scripting by IBM

- Software Engineer Intern by HackerRank

PHP, LARAVEL ON JOB TRAINING

Host Myanmar, Mandalay

2022 Nov - 2023 Apr

Developed innovative PHP Laravel projects, including online ordering and management systems, e-learning platforms, and robust authentication solutions, utilizing MySQL RDBMS.

RECENT PROJECTS

LMS

Developed LMS using Laravel framework. Integrated Google API for enhanced functionality. Incorporated payment gateway for seamless transactions. Leveraged advanced Laravel features such as Redis caching. Successfully delivered project with comprehensive features on schedule.

RoyalAC

Development of RoyalAC project with Laravel. Implemented advanced Laravel features including roles, permissions, and Excel import/export. Developed financial logic to ensure accurate calculations. Completed project meeting all client specifications and deadlines under project manager's guidance.

Medium

Created a Medium clone blog website using Laravel framework. Implemented user authentication and authorization functionalities. Integrated Laravel Socialite for seamless login via social media platforms. Developed like, unlike, and comment systems for engaging user interactions. Ensured data security and user privacy through robust authentication mechanisms. Successfully delivered project meeting all requirements within specified timeline.

Bakery Ordering System

Developed bakery ordering system using Bootstrap for frontend, PHP for backend, and MySQL for database. Implemented responsive UI with Bootstrap, handled backend logic in PHP, and ensured smooth communication with AJAX. Collaborated with team to deliver project on time, meeting all requirements for functionality and design.
